31 October 2007

526.201. haloxyfop-P-methyl

This is to inform you that Dow AgroSciences is planning to organize a collaborative trial on a method for haloxyfop-P-methyl.

Principle. The haloxyfop-P-methyl content is determined by normal phase HPLC using a 250 mm x 4.6 mm (i.d.) Chiralcel-OK column, or equivalent with the same selectivity, with mobile phase composed of heptane/isopropanol/methanol (80/10/10, v/v) and UV detection at 280 nm. Quantification is done by external standardization.

Scope. It is intended to analyze five samples consisting of two lots of technical material and three EC formulations. Samples and haloxyfop-P-methyl analytical standard will be supplied.

Time schedule. The collaborative trial is intended to be carried out during December 2007 – January 2008. Those who wish to participate should contact the organizer by 15th November 2007.
