25 September 2013

964. pyraoxystrobin

This is to inform you that Shenyang Research Institute of Chemical Industry is planning to organize a collaborative trial on a method for pyraoxystrobin.

Principle: Pyraoxystrobin content is determined by reversed phase HPLC using a 150 mm x 4.6 mm (i.d.), Zorbax SB C₁₈, 5µm column, or equivalent, with the same selectivity, with mobile phase composed of acetonitrile/water (60/40) and UV detection at 280 nm. Quantification is done by external standardization.

Scope: It is intended to analyze five samples consisting of two technical materials (TC) and three suspension concentrate formulations (SC). Samples and pyraoxystrobin analytical standard will be supplied.

Time schedule: The collaborative trial is intended to be carried out during November 2013 – March 2014. Those who wish to participate should contact the organizer by 31st October 2013.

Note: The trial is limited to maximum 20 participating laboratories because of the availability of samples and standard material. The selection is done based on the application order.

Contact:

Ms Haixia Wang
Shenyang Research Institute of Chemical Industry
No.8, Shen Liao Dong Road,
Tie Xi district, Shenyang City,
P.R. of China

E-mail to: wanghaixia@sinochem.com

Yours sincerely

L. Bura
