## 1 - Essential Information

Reporting period/year:	Number of samples analyzed (1)	Number of non-compliance (2)	Uses (3) (optional)
June 2006/ June 2007	94	58 samples	Agricultural use: 94
			Public Health use: -
			Home and Garden use: included in total, Not recorded separately
			Other uses (please specify):

(1) Any sample, including those of active inspection and registration control samples.

(2) Non-compliance with FAO/WHO or national pesticide specifications.

The reason of non-compliance:      a.i. content: (4 samples)  
    phys.-chem (7 samples)  
    Labeling deficiencies 53

(3) If possible, please indicate the use/destination of the pesticide analyzed. If the pesticide has various uses, it should be included only in one category and should be explained under item 2 (comments).

## **2 - Any comments and/or background information**

### 2.1. Information on organization of the control

In collaboration with the registration authority and the cantonal authority, we choose an active substance and analyse all available formulation on the Swiss market with this active substance. Per year we start 2 – 4 campaigns.

Sometimes we get samples from the cantonal registration authority, where the authority assumed, that the product doesn't fit with the national or FAO specifications.

## **3. CIPAC Activities**

Last year our laboratories participated in the following CIPAC/DAPA collaborative studies:

azoxystrobin

mefenpyr-diethyl

dodine

boscalid

thiacloprid
