

CIPAC

COLLABORATIVE INTERNATIONAL PESTICIDES ANALYTICAL COUNCIL LIMITED

Commission Internationale des Méthodes d'Analyse des Pesticides (CIMAP)

Secretary's report

2021 – 2022

1. Previous meeting

The 65th meeting was held on Monday 14th June 2021 using on-line communication tools. 80 people participated including members, correspondents, observers, representatives of industry.

Reports of three full scale collaborative trials, seven small scale trials, a validation study for relevant impurity were presented. One method presented was proposed to undergo a full scale collaborative trial.

The status of four provisional methods was changed to full CIPAC method. Four methods were accepted as provisional CIPAC methods. One method for the determination of the relevant impurity was noticed and adopted.

2. Elections

Five colleagues were elected as correspondent members.

3. CIPAC publications

The accepted full and provisional methods are available as pre-published methods on the CIPAC website, until the publication of the next handbook.

4. Collaborative studies

In the time period covered by the report nine full scale collaborative studies and six small scale studies were initiated and a two studies for method extension. The results will be presented on the virtual technical meeting. It worth also noted that activities started to update the CIPAC method validation guideline.
