CIPAC STATUS REPORT

01/07/2005

0610 Sulfometuron

Allocated to AOAC

CIPAC methods published in:

CIPAC J, p. 108

CIPAC 42nd meeting, July 1998 in York

The report of a collaborative study, CIPAC/4051, was presented by Mr Bloxham. 9 laboratories participated in the trial with a HPLC method. 3 TC's and 3 WG's were analysed applying a HPLC reversed phase method.

<u>Decision</u> The HPLC method for sulfometuron-methyl technical and formulations, CIPAC/4050, has been accepted as <u>provisional</u> CIPAC method

CIPAC 42nd meeting, July 1998 in York

The report of a collaborative study, CIPAC/4051, was presented by Mr Bloxham. 9 laboratories participated in the trial with a HPLC method. 3 TC's and 3 WG's were analysed applying a HPLC reversed phase method. Decision The HPLC method for sulfometuron-methyl technical and formulations, CIPAC/4050, has been accepted as provisional CIPAC method.

CIPAC 43rd meeting, June 1999 in Budapest

<u>Decision</u> The provisional HPLC method for sulfometuron-methyl technical and WG formulations, CIPAC/4050, has been accepted as <u>full</u> CIPAC method.
