

CIPAC MT STATUS REPORT

13.08.2005

MT 186 Bulk Density

Allocated to DAPF

CIPAC methods published in:

CIPAC K, p. 151

CIPAC 44th meeting, June 2000 in Granada

Mr Götzken presented a revision of MT 33, 58.3, 159 and 169 for the determination of the bulk density, CIPAC/4198. Some comparable figures should be produced and the required precision should be adjusted to 2 ml. Results of the tests will be submitted by the end of the year. The method then will get a new MT number.

CIPAC 45th meeting, June 2001 in Bangkok

Mr Götzken presented a report (4255) in which the figures of the new method were compared with those of the old ones. There were no statistically significant differences.

Decision The revision of the methods of MT 33, 58.3, 159 and 169 for the determination of the bulk density, CIPAC/44255, has been accepted as **full** CIPAC Method
