616 florasulam

This is to inform you that Jiangsu Agrochem Laboratory is planning to organize a full-scale collaborative trial on a method for florasulam.

Principle: The content of florasulam in formulations is determined by reversed phase HPLC on a 150 x 4.6 mm (i.d.), 5µm C18 column (Zorbax SB C18 or equivalent), with mobile phase composed of acetonitrile/water (pH 2.1) and UV detection at 260 nm. Quantitation is done by external standard calibration.

Scope: It is intended to analyze five samples consisting of two lots of technical material (TC), and three lots of suspension concentrate (SC). Samples and florasulam analytical standard will be supplied.

Time schedule: The collaborative trial is intended to be carried out during October 2019-December 2019 (shipment: middle of October 2019). Those who wish to participate should contact the organizer by 30th September 2019. The results should be reported by 31th December 2019.

Contact:

Mr Eric Zhao P.
Jiangsu Agrochem Laboratory Co., Ltd.
