CIPAC INFORMATION SHEET No. 353

December 2024

888 Nonanoic acid

Dear Colleague,

This is to inform you that Valent BioSciences LLC. is planning to organise a full-scale collaborative trial on a method for nonanoic acid.

Principle: The content of nonanoic acid in the technical material and formulations is determined by high performance liquid chromatography on a reversed phase column (Agilent Zorbax SB-C18, 5 µm, 250 x 4.6 mm, or equivalent) at 30°C with UV detection at 210 nm, with mobile phase composed of acetonitrile/water. Quantitation is done by external standard calibration.

Scope: It is intended to analyse 3 samples consisting of technical materials (TC). Samples and analytical standard will be provided.

Time schedule: The collaborative trial is intended to be carried out between February 2025 and July 2025. Those who wish to participate should contact the organiser by February 1st, 2025. The results should be reported by the end of July 2025.

Note: The trial is limited to 12 participating laboratories due to the availability of samples. The selection is based on the application order.

Contact:

Mr Kelly Robinson
Valent BioSciences LLC.
1901 Innovation Way, Suite 100,
Libertyville, IL
USA
