### CIPAC INFORMATION SHEET No. 236

Your Ref:  
Our Ref: MDM  
05. September 2002

#### 734. flufenzine

Dear member,

This is to inform you that AgroChemie is planning to organize a collaborative trial on a method for flufenzine (SZI-121).

**Principle.** The flufenzine content is determined by reversed-phase HPLC using a 25 cm x 4 mm Spherisorb 5 ODS column (or equivalent) with acetonitrile/water mobile phase. The compound is detected with a UV detector at 270 nm and quantification is done with external standardization.

**Scope.** It is intended to analyze four samples consisting of two technicals and two lots of two different SC formulations. Samples and flufenzine analytical standard will be supplied.

**Time schedule.** The collaborative trial is intended to be carried out during November 2002 – end of February 2003.

Those who wish to participate should contact the organizer, by e-mail or post, by 30 September 2002.
