CIPAC INFORMATION SHEET No. 253

Your Ref:
Our Ref: LB
7 October 2004

603. fenhexamid

Dear Member,

This is to inform you that DAPA/Bayer Industry Services is planning to organize a collaborative trial on a method for fenhexamid.

Principle: The content of fenhexamid is determined by reversed phase HPLC using a Lichrospher RP 18/5 250 x 4 mm column (or equivalent), eluent: water buffered with sodium dihydrogen phosphate / acetonitrile 35/65 v/v and UV detection at 254 nm. Quantification is done by external standardization.

Scope: It is intended to analyse the technical concentrate and WP, WG and SC formulations (5 samples). Fenhexamid analytical standard will be supplied.

Time schedule: The collaborative work is intended to be carried out during February - March 2005 (shipment in December 2004).

Those who wish to participate should contact the organizer by 15th November 2004.

Contact:

Dr. Tilmann Werner
Bayer Industry Services GmbH & Co. OHG
BIS-SUA-PUA II
KS BCS DOR, Geb. Da 5
