### CIPAC INFORMATION SHEET No. 304

Your Ref:  
Our Ref: LB  
November 2015

#### 693 Fenazaquin

Dear Colleague,

This is to inform you Gowan Company is planning to organise a full scale collaborative trial on a method for fenazaquin.

**Principle:** The content of fenazaquin in TC and SC formulations is determined by reversed phase high performance liquid chromatography on a 250 x 4.6 mm (i.d.), 5 µm C8 column (Kromasil 100-5 C8, or equivalent) with mobile phase composed of acetonitrile/water (70/30 v/v) and UV detection at 260 nm. Quantitation is done by external standardisation.

**Scope:** It is intended to analyze four samples consisting of two technical materials and two SC formulations. Samples and fenazaquin analytical standard will be supplied.

**Time schedule:** The collaborative trial is intended to be carried out during December 2015- April 2016 (shipment in December 2015). Those who wish to participate should contact the organiser by 30 November 2015. The results should be reported by the end of April 2016.

**Further information:** The trial is limited to maximum 15 participating laboratories (selection based on first arrived, first served).

**Contact:**

Rene Cochran  
Gowan Company  
P.O. Box 5569  
Yuma, AZ85366-5569  
U.S.A.
