### CIPAC INFORMATION SHEET No. 319

Your Ref:  
Our Ref: LB  
April 2019

#### 318 phosmet

Dear Colleague,

This is to inform you that Gowan Crop Protection Limited is planning to organise a full-scale collaborative trial on a method for phosmet.

**Principle:** The content of phosmet in technical material and formulations is determined by reversed phase high performance liquid chromatography on a 250 x 4.6 mm (i.d.), 5 µm C18 column (base deactivated endcapped octadecylsilyl bonded silica, ex. Altima C18, or equivalent), with mobile phase composed of acetonitrile/water (60/40) and UV detection at 254 nm. Quantitation is done by external standardisation.

**Scope:** It is intended to analyse 4 samples consisting of two technical materials (TC), one water dispersible granule (WG) and one emulsifiable concentrate (EC). Samples and phosmet analytical standard will be supplied.

**Time schedule:** The collaborative trial is intended to be carried out during May 2019- June 2019 (shipment: end April 2019). Those who wish to participate should contact the organiser by 15<sup>th</sup> of April 2019. The results should be reported by the end of June 2019.

**Contact:**

Dr. Thomas Reisinger  
SCC GmbH  
Am Grenzgraben 11  
55545 Bad Kreuznach  
Germany

Tel.: +49-(0)671-298 46-185  
Fax: +49-(0)671-298 46-100  
E-mail: [thomas.reisinger@scc-gmbh.de](mailto:thomas.reisinger@scc-gmbh.de)

Yours sincerely

L. Bura  
Secretary
