CIPAC INFORMATION SHEET No. 341

Our Ref: LB
August 2023

494 tebuconazole

Dear Colleague,

This is to inform you that Jiangsu Sevencontinent Green Chemical Co. Ltd. is planning to organize a full scale collaborative trial on a method for the determination of tebuconazole.

Principle: The content of tebuconazole in technical material and the formulations is determined by gas chromatography on a HP-5 (or equivalent with the same selectivity) fused silica column, 30 m x 0.32 mm i.d., 0.25 µm film thickness, using helium as carrier gas and flame ionization detection. Quantitation is done by internal standard calibration.

Scope: It is intended to analyse ten samples i.e. two technical materials (TC), two emulsion concentrates (EC), two suspension concentrates (SC), two wettable powders (WP) and two emulsion in water (EW). Samples, analytical standard and internal standard will be provided.

Time schedule: The collaborative trial is intended to be carried out between November 2023- 15th February 2024. Those who wish to participate should contact the organiser by 5th November 2023. The results should be reported by the 15th February 2024.

Further information: The trial is limited to 15 participating laboratories due to the availability of samples. The selection criterion is "first come, first served".

Contact:

Terry Wang
Jiangsu Sevencontinent Green Chemical Co., Ltd.
